	Mean	Median	SD	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
1. Overall, I learned a great deal from this course.	4.50	5.00	0.67	22	0.0%	0.0%	9.1%	31.8%	59.1%
2. The instructor treated all students with respect.	4.91	5.00	0.29	22	0.0%	0.0%	0.0%	9.1%	90.9%
3. The instructor encouraged students to participate in this class.	4.68	5.00	0.48	22	0.0%	0.0%	0.0%	31.8%	68.2%
4. The instructor saw cultural and personal differences as assets.	4.45	5.00	0.74	22	0.0%	0.0%	13.6%	27.3%	59.1%
5. I could really be myself in this course.	4.36	4.50	0.73	22	0.0%	0.0%	13.6%	36.4%	50.0%
6. In this course I had multiple opportunities to express my viewpoints and questions.	4.32	5.00	0.89	22	0.0%	4.5%	13.6%	27.3%	54.5%
7. The course challenged me to think deeply about the subject matter.	4.36	5.00	0.85	22	0.0%	4.5%	9.1%	31.8%	54.5%
8. The design of this course (e.g., its format, selected materials, assignments, exercises, quizzes, etc.) helped me better understand the subject matter.	4.50	5.00	0.60	22	0.0%	0.0%	4.5%	40.9%	54.5%
9. Overall, this course was excellent.	4.45	4.50	0.60	22	0.0%	0.0%	4.5%	45.5%	50.0%

11. The instructor held class meetings consistent with the official schedule published for this course.		
N	Yes	No
22	100.0%	0.0%

Open-Ended Responses

1. In what ways did your instructor make learning possible for you during the Fall 2023 semester?

Comments
Very open with the students, made it very entertaining. Motivated examples of what we would learn down the line.
Always mentioned to come to office hours if we needed help
He was always willing to backtrack when needed as he was super big on ensuring understanding of the material.
The best trait the instructor has is his genuine interest in having the students know the "why" behind statistical concepts and topics. Over the semester, he spent numerous times explaining the exact reason certain methods are performed and the benefits of implementing this methods in statistical analysis. The instructor also bridged different fields of math (like Calculus) with this introductory course, showing students that mathematics is all connected and there's more to it than just memorizing equations.
Always allowed people to ask questions and explained the answers without judgement.
Panos made learning possible by inviting questions and explaining stats concepts in great detail so that I was able to understand the measures used with a greater understanding than just memorizing. Sometimes the class gets a bit theoretical for it's level but I enjoyed some of these higher level conversations.
Very understanding and engaged
He was very open to questions and feedback and made sure students understood the information as he went through the lesson.
He is very kind and patient with the students, he creates a great environment to learn in. I did struggle from time to time when the professor would assume that we knew things that I could benefit from having reviewed. Additionally, I would like more problems to apply the concepts in real-world scenarios in class. Overall, Panos is a great professor, who is much too hard on himself!!!
He was very understanding and helpful during a tough time. He also made sure everyone completely understood the topic before moving on.
Professor Andreou explained and demonstrated the material in ways that made it easier to understand and practice. I felt I was learning and able to use the material/information independently, rather than just listening to what he was teaching.
Professor Andreou provides class notes on Canvas clearly and great practices before every midterm.
Panos was always available for office hours and quickly answered emails. He was very accommodating when I was not able to make it to class, and provides all resources on Canvas. He was a super engaging and funny instructor which really made me want to attend class.
He taught well during the lectures.
He was very helpful and held lots of office hours and was very understanding.
Provided practice questions before the midterms and was almost always available to email and answer questions.

2. Which aspects of this course should be kept for future times this course is taught?

Comments
One aspect that should be kept for future semesters is the style of teaching since this is an introductory course. Lectures using prepared powerpoint slides that students can study on their own before and after class is very beneficial.
I would keep the same homework structure and midterm structure, so I wouldn't really change much. I would maybe add some minor review assignments for extra points before Midterms/exams but overall I had no issues with the structure of the class aside from the 4:40pm start time haha.
The slides posted into Canvas are super helpful and the useful notes at the end of the semester. The repeating of the class material at the beginning of each class.
I really find the review days helpful!
All aspects of this course should be kept the same.
The practice midterms and homework were helpful.
Class notes on Canvas clearly and great practices before every midterm should be kept for future times this course is taught.
I really enjoyed all aspects of this course.
I think it is fine how it is.
His review and consistent posting of the lectures was very helpful!
Practice midterms and lots of practice questions during lecture
The instructor was very open to feedback from the students.
Weekly homework
I really like how Panos draws on the whiteboard during instruction as that is much more engaging than merely lecturing with a bunch of slides.
