## EDUCATION

---

### PhD Statistics & Operations Research

University of North Carolina at Chapel Hill

Expected: May 2026

Chapel Hill, NC

### MSc Statistics & Operations Research

National and Kapodistrian University of Athens

Jun 2023

Athens, Greece

*Thesis title:* The Bootstrap Method for Discrete-Time Markov Chains and Applications

GPA: 9.33/10

### BSc Mathematics

National and Kapodistrian University of Athens

Jun 2020

Athens, Greece

*Specialization in Statistics & Operations Research*

GPA: 9.44/10 (top 1.2%)

## RESEARCH

---

*Group Factor Models for Mixed-Frequency Panel Data* (in preparation)

with Andrii Babii, Eric Ghysels, and Mirko Rubin

*Homogeneity Fusion for Grouped Network VAR Models* (in preparation)

with Vlasdas Pipiras & Changryong Baek

*Opinion dynamics on non-sparse networks with community structure* ([Minor revisions](#))

with Mariana Olvera-Cravioto

## EXPERIENCE

---

### Research Assistant

University of North Carolina at Chapel Hill

- “Machine Learning for Time Series” May 2025 - May 2026  
PIs: Gerald Cohen, Eric Ghysels
- PROJECT ID: 5122181, “Network Time Series: From Dynamics to Coevolution” Summer II, 2024  
PI: Vlasdas Pipiras
- NSF grant CMMI-2243261: “Opinion Dynamics on Complex Networks” Spring 2024  
PI: Mariana Olvera-Cravioto

### Instructor

University of North Carolina at Chapel Hill

- STOR 155 - Introduction to Data Models and Inference Fall 2023, Summer 2024, Spring 2025

### Teaching Assistant

University of North Carolina at Chapel Hill

- STOR 654 - Theoretical Statistics I (PhD) Fall 2024
- STOR 435 - Introduction to Probability Spring 2023
- STOR 557 - Advanced Methods in Data Analysis Fall 2022
- STOR 155 - Introduction to Data Models and Inference Spring 2021
- STOR 151 - Introduction to Data Analysis Fall 2021

### Tutoring Undergraduate Students

University of North Carolina at Chapel Hill

- STOR 113: Decision Models for Business and Economics
- STOR 155: Introduction to Data Models and Inference
- STOR 215: Foundations of Decision Sciences (Discrete Math)
- STOR 435: Introduction to Probability
- STOR 445: Stochastic Modeling
- PLCY 460: Quantitative Analysis for Public Policy

## TECHNICAL SKILLS

---

**Programming Languages & Libraries:** Python (pandas, NumPy, scikit-learn, statsmodels, matplotlib, seaborn), R (tidyverse, midasr, ggplot2)

**Statistical & Data Tools:** SAS (TAQ data extraction from WRDS), MS Excel

**Typesetting:** MS Word, PowerPoint, LaTeX

## AWARDS

---

|                                                                                         |          |
|-----------------------------------------------------------------------------------------|----------|
| <i>2025 MLAX Faculty/Staff Appreciation Day</i> ( <a href="#">Link</a> )                | Feb 2025 |
| <i>Excellence in Teaching Assistance and Instruction Award</i> ( <a href="#">Link</a> ) | Dec 2022 |
| <i>National Prize Money Award</i> , for top score in the Panhellenic Exams              | Nov 2016 |
| <i>Award from the Department of Mathematics</i> , for entering 2nd among 250 students   | Aug 2016 |

## TALKS

---

|                                                                                                                                                    |                             |

## COURSE PROJECTS

---

|                                                                                                                        |
|------------------------------------------------------------------------------------------------------------------------|
| <b>Mathematics of Deep Q-Learning</b> for the graduate course <i>Reinforcement Learning</i>                            |
| <b>Simulating the Movement of Trains and Passengers</b> for the graduate course <i>Simulation Modeling</i>             |
| <b>Mean Field Analysis for PageRank</b> for the graduate course <i>Probability for Networks and Algorithms</i>         |
| <b>Generative Adversarial Networks</b> for the graduate course <i>Applied Statistics II</i>                            |
| <b>Estimating the Transition Matrix of a Markov Chain</b> for the graduate course <i>Object Oriented Data Analysis</i> |
| <b>Bayesian Linear Regression and MCMC methods</b> for the graduate course <i>Bayesian Inference</i>                   |

**Jackknife and Bootstrap** for the undergraduate course *Nonparametric Statistics*

**Time Series Analysis for Investment Data** for the graduate course *Time Series*

**Factor Analysis of the Greek Workforce Distribution** for the undergraduate course *Multivariate Data Analysis*

## LANGUAGES

---

**Greek:** Native Language

**English:** Fluent (C2 Michigan, IELTS: 8.5/9)

**German:** Intermediate Level (B2, Goethe Institut)

## EXTRACURRICULAR ACTIVITIES

---

- Co-author in a file ([Link](#)) for *Mathematical Statistics*, 2024
- Co-translator of Prof. Loukia Meligkotsidou's book *Bayesian Inference*, 2019
- Contribution as a high school student at the writing of a mathematics book for the panhellenic exams, 2016
- School Table Tennis Championship, 2012, Gold Medal
